These are the features of our content management systems:

Rich text editor (RTE) Multiple RTEs with Microsoft Word-like icons, support for Win/IE and Mozilla/Firefox on all platforms; WYSIWYG editors are highly configurable - buttons and CSS styles can be added and removed

Multiple editor backend By checking a few boxes, administrators can compare the permissions of one user/group to another

User privileges

An administrator can grant as little or as much control to content editors or groups as needed. They can remove buttons and extensions that are not needed for different editors

Search engine

Find text even when it is hidden in MS Word documents or PDF files

Multi-language Support Language "layers" can be added to the website. Content and extensions can be translated side-by-side, making it very intuitive for an editor.

Extensions and plugins

Lots of extensions like forum, calendar, guest book, sitemaps, banner systems, email forms, votings, ratings, FAQs, glossary, news and online shops...

Einfach installiert mit einem Klick.

Editor A full WYSIWYG editor gives you the possibility to insert and edit text, images and files

File management Upload files such as PDF, images and DOC files

Multilingual sites

Easy synchronisation between the languages

Newsletter module

Allows you to send professional looking newsletter to single users or user groups

User management Different users and user groups can edit the content of the website

Statistics Check the number of your visitors on your website and see what content was visited
